

Complete listing of all Classical e-rolls

This listing has been made available for researchers or anyone seeking particular e-roll files. Listing is of all e-roll files of classical music derived from Ampico, Duo-Art and all types of Welte reproducing piano rolls that are currently available at petersmidi.com. The listing includes a column to identify the roll type, and entries can be sorted using this column. The one or two letters that identify the brand of roll are:

- A, AA and AB refer to Ampico, in which A = e-rolls recorded in the 1980s, AA = Ampico model A e-rolls, AB = Ampico model B e-rolls.
- DA = Duo-Art e-rolls.
- GW = Green Welte, LW = Licensee Welte, RW = Red Welte (Welte-Mignon) e-rolls.

Making a personalised selection of e-rolls

- Costs are 20c per MIDI file plus a handling charge of \$5 per fifty MIDI files.
- Download the Excel file 'All Classical e-roll Files' and when opened in MS Excel (2003 and up) mark a letter (x) in the 'select' column next to the files you want.
- Email the completed Excel file to peter@petersmidi.com.
- When the files are collated and ready to send, we will send you a PayPal invoice.
- When payment is made, we will email (or send via a transfer program) a zip file containing your selection of MIDI files.

Titles and file names

When each roll was documented, the name of the work was taken from the roll label, as was the title of the MIDI file. However, there is considerable inconsistency in item titles between each brand of roll, which becomes apparent when all files are combined in the one listing. In this listing, titles have been harmonised, as far as possible, to cause all recordings of the same work to appear together in the listing. Because of the many changes that have been made to achieve this, MIDI file names no longer always match the names of the works. At this stage, MIDI file names have not been changed, to retain consistency with all other listings available from petersmidi.com.

Differences – complete listing and roll brand listings

Developing this listing has brought to light a number of errors, such as incorrect keys, opus numbers and spellings. Some corrections have been made to the roll brand listings, which means the complete listing is more likely to be correct. For further information about composers and pianists, see the listings for each brand of roll. However, these will especially differ in the names of some of the recordings, as titles have only been changed in the full listing.

Duplication

There are instances of the same recording appearing on different types of rolls:

1. Recordings transferred between Ampico or Duo-Art rolls, either by the factory during the 1930s, or by enthusiasts in later years. For example, Duo-Art rolls that were transferred to Ampico during the 1930s such as Paderewski playing Beethoven's Moonlight Sonata, and Iturbi playing Sequidillas Op.232 No.5 by Albeniz. The e-roll files of both recordings are included in the listing.
2. Some recordings made for the Welte-Mignon also appear on Licensee and Green Welte e-rolls. Licensee issues often differ from the Welte-Mignon recordings.
